

Arise Racing - Motorsport Education Program

For 2021, Arise Racing is expanding its voluntary Motorsport Education Program. Previously limited to ECU Motorsports Engineering Students, we are now considering any person above the age of 16 who wishes to apply.

The expansion of this program helps us to further meet our goals to develop and assist not only young talented drivers, but aspirational race mechanics with dreams of Formula 1, Supercars and beyond.

Opportunities of the program include:

- Chance to gain insight into industry procedures and practices.
- Mentoring by internationally experienced race mechanics with experience in British Touring Car, Porsche Carrera Cup, McLaren Pure Events and various open wheel categories.
- Understanding of the attention to detail, quality of work and high level work ethic required to pursue a career in motorsports.

While there are no strict requirements to apply, priority will be given to those who have some previous motorsport experience whether it be in previous employment, or personal projects and interests.

Please get in contact through our website with a brief cover letter to register your interest.
